

Benefect Testimonials

CLEANING and RESTORATION

"...we love your product and I think your exceptional efforts are uplifting to any business owner!"

Paul D. Suddes, Owner, Paul Davis Systems - Halton/Hamilton-Wentworth

MEDICAL and HEALTH FACILITIES

"You have created something that helps people avoid quats [quaternary ammonia], and that is a major accomplishment."

Bruce M. Small, President, Envirosesic, Building Inspections for Hypersensitivity and Allergy

WORK PLACE

"Just thought I would drop you a note to tell you how fantastic the *Benefect*[®] worked for us in the recent sewer backup claims in Lethbridge. Some customers were very suspect and called the local Health Board. Then the Board asked the college to test the product and they could not believe how effective the product was, and more importantly how safe it is. We are now making it a mandatory product in all our offices. Thanks again."

Ken Tucker, President, CSAR Management Ltd. - Calgary

MEDICAL and HEALTH FACILITIES

"We have been disinfecting the ducts in one of our local nursing homes for the past 5 years. The past two years we have been using *Benefect*[®] to do the job. When we did our sales follow up to see how they enjoyed our service and ask how the new disinfectant performed, I was told that for the past two years, they have had more than a 20% decrease in client illness during the cold and flu season, as well as almost a 25% decrease in sick days from the staff. These positive changes coincide with our using the all natural *Benefect*[®]."

Grant, Service Manager, Sears Indoor Clean Air Services

WIDE VARIETY OF USES

"The extermination rate consistently displayed by *Benefect*[®] to a broad range of microorganisms, and *Benefect*'s composition of all-natural ingredients, suggest that it would be very useful under a wide variety of circumstances. Hospitals, daycare centers, doctors' offices, schools and public places where water or food may be consumed are all institutions where *Benefect*[®] could be used. It is important to realize that *Benefect*[®] is far superior to synthetic disinfectants because of its ability to kill a broad range of microorganisms, but with such low toxicity. Any residue of synthetic disinfectants can be poisonous to children and adults if contacted through the skin or ingested."

Gary Palmateer, President, GAP EnviroMicrobial Services Inc. (expert witness in Walkerton e.coli inquiry)

SCHOOLS

"We use **Benefect**[®] Disinfectant spray, instead of bleach, to disinfect the shared recorders for our music program and the referees' whistles for our sporting events. We know that since the product is so safe, it is suitable for the students to put the disinfected instruments and whistles in their mouths without any worries to their health."

Jan Gregg, Principal, Upper Grand District School Board

MEDICAL and HEALTH

"**Benefect**[®] is the most effective way we have found to treat bacteria-borne odor in prostheses."

**Charles Osbourne, V.P. Sales & Marketing, Cascade Orthopedic Supply;
Worldwide distributors of orthotics & prosthetics**

YOUR SAFE HOME

"When I was working for The Bay Home Services we used **Benefect**[®] in the furnace ducts using a fogger (Mister). Now that I have my own Home Service Company and Janitorial Company, I use **Benefect**[®] in a Ninja steam cleaning machine. Customers could not believe the pleasure of the smell and the fact that it killed all the germs. Thank you for such a wonderful product."

Gerard Hebrard, President and C.E.O, A. Leader Janitorial and Home Services

YOUR SAFE PET

"I have been breeding dogs for over 20 years and have tried numerous products to control germs in the kennels and in the house. **Benefect**[®] is the only product I have tried that not only kills germs, but has exceptional odor neutralizing properties leaving a mild and pleasant smell wherever it is used. And, being all natural, I know my dogs are safe and I can use **Benefect**[®] in their eating areas, whelping pens . . . vari-kennels without any worry to their health."

**Anne Dixon-Zboroswky, Owner Sineade Kennel, Pedigree Breeder of the Year
2001**

YOUR SAFE HOME

"We have been using the **Benefect**[®] Natural Disinfectant for our duct cleaning and carpet cleaning applications for years now and have always been impressed with its results. Being in the Indoor Air Quality industry, we know that ducts and carpets are breeding grounds for biological growth, however we do not agree with putting harsh chemicals in the home to remove the source. We also do not want our technicians to be breathing harsh chemicals day in and day out, so the reason for **Benefect** to be a part of our business is two-fold."

Lindsay Graydon, President, Home Heroes Inc.
